JW

JORDAN WADE

WEB DEVELOPER

I am a web developer and one of my strongest skills is the ability to quickly spot patterns and mistakes. I am very reliable when it comes to quickly and effectively relaying the information to the appropriate person. I am looking to incorporate my leadership and communication skills into the development community to help create stronger team functionality.

PROJECTS

Manifest Social
- Built through React and Node.js
- First solo project at General Assembly; built over the course of five days
- Pulls videos from Youtube, Facebook, and Google Plus APIs. Users can search by one user and find videos from multiple sources.
- www.github.com/jwade21/manifest-social

Beer Traveler
- IOS App; built through React Native and Realm
- Pulls from BreweryDB's API to show lists of beers, categorized by Beer, Brewery, ABV, and Location. Users can then save their "Tasted" or "Want to Taste" beers to their phone's local storage
- www.github.com/jwade21/thirsty-loris

Date Night
- Full-Stack web application built using Node.js, Express, MongoDB , and Auth0
- First Group project at General Assembly; built over the course of five days
- App pulls from multiple APIs to suggest date ideas, which users can save and modify in their personal profiles
- www.jwade21.github,io/date-night
